ABOUT TOPCAR

The TOPCAR paint protective film coating adopts the third generation of Japanese Kasoo, which has more stable and excellent functions such as repair, anti fouling, and hydrophobicity. The substrate uses optical grade aliphatic TPU substrates made of well-known raw materials such as Lubrizol, BASF, and Kostron, which have good toughness, easy construction, and better resistance to yellowing, making our paint protective film more durable. The adhesive uses the exclusive customized version of pressure sensitive adhesive from BOSTON, ensuring that our products are easier to apply and do not show signs of peeling or damaging the car paint.

ABOUT TOPCAR PPF

PROFESSIONAL HIGH-END CAR WRAPPING FILM MANUFACTURER

TOPCAR Vinyl focused on high-end quality car wrap vinyl manufacture.

Provide affordable price & fast delivery service.

PPF COMPARISON

REGULAR VS EMBEDDED

REGULAR PPF

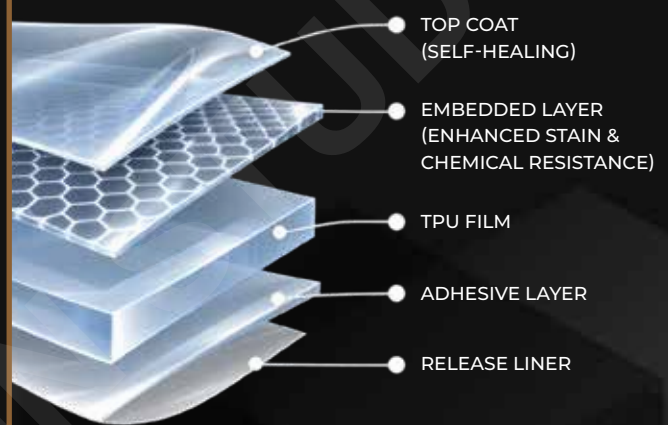

STANDARD PROTECTION

REGULAR PPF USES A STANDARD TPU STRUCTURE, PROVIDING RELIABLE PROTECTION AGAINST SCRATCHES, STONE CHIPS AND DAILY WEAR.

EMBEDDED PPF

ENHANCED DURABILITY & CLARITY

EMBEDDED PPF ADDS A SPECIAL EMBEDDED LAYER WITHIN THE FILM, OFFERING HIGHER DURABILITY, BETTER STAIN RESISTANCE AND LONGER LASTING CLARITY.
